C-06 RESTORATION VENDOR PROFILE • RESTORATION ERP, FIELD OPS & TELEMETRY

Breesy AI

AI Voice Intake, Dispatch & CAT Command Center for Restoration

Field	Primary-Source Verified Detail (Snapshot 2026-11-21)
Canonical Entity	Breesy AI
Census Sector	Restoration ERP, Field Ops & Telemetry
Headquarters	USA
Ownership Class	Independent Operating Vendor
Official Website	https://www.breesy.ai/
Primary Verification Source	https://www.breesy.ai/

Executive Field Summary

Restoration-focused AI operating layer delivering 24/7 AI voice answering, emergency intake qualification, marketing-to-booked-revenue attribution, and surge-capacity CAT command workflows.

Core Capabilities & Restoration Workflow Fit

Breesy Voice 24/7 after-hours emergency intake, call recording and revenue-leak analytics, CAT Command Center storm surge intake, and direct job creation into restoration CRMs/ERPs.

Corporate Ownership & M&A Verification Note

Independent privately held AI software company (Breesy LLC; SOC 2 Type II compliant) built specifically for restoration operators.

Procurement Due-Diligence & Field Watch-Outs

Run live recorded test calls simulating panicked homeowners and commercial facility managers before replacing human after-hours dispatch, and verify emergency escalation failover rules.

Ecosystem & Software / Distribution Integrations

Integrates with restoration job-management ERPs, telephony systems, and call-tracking/marketing attribution stacks.

Practitioner Frequently Asked Questions

Q: How does Breesy AI differ from traditional live-agent answering services?
Breesy AI answers unlimited simultaneous calls instantly during severe storm spikes without hold queues, captures structured loss intake data, and ties inbound leads directly to booked job revenue.

Q: Is Breesy AI compliant with enterprise security expectations?
Breesy LLC publishes SOC 2 Type II compliance across its restoration voice and intake platform.

Q: When is CAT Command Center most valuable?
During sudden regional freezes, hurricanes, or flash floods when inbound emergency water-loss calls overwhelm internal dispatch desks.
