## Executive Field Summary

Targeted heat-drying specialist manufacturing the Drymatic II heat-exchange drying unit, Boost Bars, and modular floor/wall heat-drying mats engineered to dry dense hardwood, plaster, and concrete assemblies rapidly.

## Core Capabilities & Restoration Workflow Fit

Controlled exhaust/recirculation heat drying (Drymatic II), inline Boost Box heat add-ons, targeted hardwood and wall mat kits, and built-in digital hygrometer/temperature automation.

## Corporate Ownership & M&A Verification Note

DBK USA, Inc. (Drymatic North America) is the US operating subsidiary of German thermal-engineering group DBK David + Baader GmbH, disclosed under Option B corporate-parent badge rules.

## Procurement Due-Diligence & Field Watch-Outs

Verify 115V/20A circuit availability on residential jobsites, train technicians on safe surface-temperature limits for engineered wood/adhesives, and validate carrier line-item billing for specialty heat drying.

## Ecosystem & Software / Distribution Integrations

Integrates alongside existing LGR dehumidifiers and negative-pressure cavity drying setups.

## Practitioner Frequently Asked Questions

**Q: Who is the parent company behind DBK USA and Drymatic?**
DBK USA, Inc. is the North American subsidiary of German thermal management manufacturer DBK David + Baader GmbH.

**Q: Where does Drymatic targeted heat drying outperform conventional LGR drying alone?**
Dense low-permeance assemblies—such as hardwood floors over subflooring, double-brick walls, and wet concrete slabs—dry significantly faster when controlled vapor-pressure heat is applied directly via mat kits.

**Q: How is DBK USA distinct from unrelated barcode companies with similar initials?**
Restoration Intel verified DBK USA's live site at us.drymatic.com directly against DBK David + Baader GmbH's thermal-drying division, separating it cleanly from non-restoration firms.
