C-06 RESTORATION VENDOR PROFILE • DRYING, IAQ, CONTAINMENT & CLEANING OEMS

Esporta Wash Systems Inc.

Hydraulic Soft-Contents Restoration & Sanitization Machine OEM

Field	Primary-Source Verified Detail (Snapshot 2026-11-21)
Canonical Entity	Esporta Wash Systems Inc.
Census Sector	Drying, IAQ, Containment & Cleaning OEMs
Headquarters	Kelowna, BC
Ownership Class	Independent Operating Vendor
Official Website	https://esporta.ca/
Primary Verification Source	https://esporta.ca/

Executive Field Summary

Specialty hydraulic wash-system OEM enabling restoration contractors to process smoke-, soot-, and Category 3 sewage-contaminated soft contents (textiles, leather, sports gear, plush) in-house.

Core Capabilities & Restoration Workflow Fit

Patented hydraulic-action industrial wash chambers (ES-3300), proprietary biodegradable detergents, certified pathogen/soot removal protocols, and operator certification network.

Corporate Ownership & M&A Verification Note

Independent privately held specialty equipment OEM (Esporta Wash Systems Inc.) serving in-house restoration contents facilities.

Procurement Due-Diligence & Field Watch-Outs

Verify local carrier acceptance of soft-contents restoration vs. replacement (cash-out) rates in your territory, plus plant utility specs (water, drain, 3-phase power, drying room footprint).

Ecosystem & Software / Distribution Integrations

Pairs with contents pack-out inventory software (Promatic ListerMobile, Encircle, ContentsTrack) and ultrasonic hard-contents lines (Morantz).

Practitioner Frequently Asked Questions

Q: Why do restoration companies bring Esporta soft-contents cleaning in-house?
Processing fire- and water-damaged clothing, leather, and household textiles in-house captures high-margin contents revenue instead of subcontracting to third-party textile networks.

Q: Can Esporta systems clean Category 3 sewage-affected textiles?
Yes; Esporta's hydraulic wash process and validated detergent recipes are specifically engineered to sanitize heavy biological and soot contamination that standard washers cannot salvage.

Q: What facility requirements apply to an Esporta installation?
Operators need a dedicated contents processing warehouse bay with commercial hot water, drainage, power, ozone/deodorization staging, and climate-controlled drying racks.
