Executive Field Summary

Smartphone-driven 3D property modeling and measurement platform converting walkaround photos into exterior siding, roofing, window, and interior room dimensions for insurance claims and reconstruction.

Core Capabilities & Restoration Workflow Fit

Exterior and interior 3D models from standard phone cameras, itemized roof/siding/opening measurement PDFs, Xactimate ESX exports, design visualization, and homeowner self-capture links.

Corporate Ownership & M&A Verification Note

Independent privately held venture-backed computer-vision and 3D measurement software company.

Procurement Due-Diligence & Field Watch-Outs

Audit per-property credit costs for complete-exterior vs. roof-only packages and check turnaround SLA times during peak hail and hurricane surge periods.

Ecosystem & Software / Distribution Integrations

Verisk Xactimate/XactAnalysis, Cotality Symbility, JobNimbus, CompanyCam, Beacon/QXO and ABC Supply material ordering portals.

Practitioner Frequently Asked Questions

Q: How does HOVER differ from aerial imagery vendors like EagleView?
HOVER generates measurements from ground-level smartphone photos—capturing siding, windows, soffits, and interior rooms occluded by tree cover—whereas aerial vendors rely primarily on aircraft imagery.

Q: Can HOVER export directly into Xactimate?
Yes; HOVER supports direct ESX sketch exports so estimators can populate roof and elevation line items without redrawing measurements manually.

Q: Does HOVER support interior restoration claims?
Yes; HOVER includes interior floor-plan and room measurement capture alongside its flagship exterior roofing and siding models.
