C-06 RESTORATION VENDOR PROFILE • RESTORATION ERP, FIELD OPS & TELEMETRY

JobNimbus

Exterior Restoration & Roofing CRM, Production Boards & Payments

Field	Primary-Source Verified Detail (Snapshot 2026-11-21)
Canonical Entity	JobNimbus
Census Sector	Restoration ERP, Field Ops & Telemetry
Headquarters	Lehi, UT
Ownership Class	Independent Operating Vendor
Official Website	https://www.jobnimbus.com/
Primary Verification Source	https://www.jobnimbus.com/

Executive Field Summary

Kanban-style contractor CRM and project management platform widely deployed by storm-restoration, roofing, and exterior-rebuild contractors integrating aerial measurements, material ordering, and payments.

Core Capabilities & Restoration Workflow Fit

Visual job-status boards, automated customer/adjuster communications, integrated roof measurement ordering, supplier material-list exports, mobile photo capture, and JobNimbus Payments.

Corporate Ownership & M&A Verification Note

Independent operating software company backed by private equity (Sumeru Equity Partners completed a $330M strategic control investment in November 2024).

Procurement Due-Diligence & Field Watch-Outs

Evaluate whether your business mix is exterior-rebuild heavy (JobNimbus sweet spot) versus emergency water-mitigation heavy (which requires add-on moisture logging via Encircle or a mitigation ERP).

Ecosystem & Software / Distribution Integrations

EagleView, HOVER, CompanyCam, QuickBooks Online/Desktop, Beacon/QXO, ABC Supply, SRS Distribution, and Xactimate workflows.

Practitioner Frequently Asked Questions

Q: When is JobNimbus a better fit than a water-mitigation ERP?
Contractors whose revenue centers on storm roofing, siding, gutters, and insurance reconstruction favor JobNimbus for its visual production boards and distributor material integrations.

Q: Who backs JobNimbus?
In November 2024, Sumeru Equity Partners led a $330 million strategic control investment in JobNimbus alongside existing investors and co-founders.

Q: Can JobNimbus connect with EagleView and CompanyCam?
Yes; native integrations let estimators order EagleView or HOVER measurements and sync CompanyCam photo folders directly inside each JobNimbus job card.
